

2009 Financial Summary

As we work toward the goal of advancing the common good, we also work to earn our community’s trust every day by maintaining the very highest standards of accountability and transparency.

We believe we have a responsibility, both to our donors and to the community itself, to ensure that the dollars people entrusted to us are invested in ways that will produce the greatest measureable impact on lives, enabling our region to thrive.

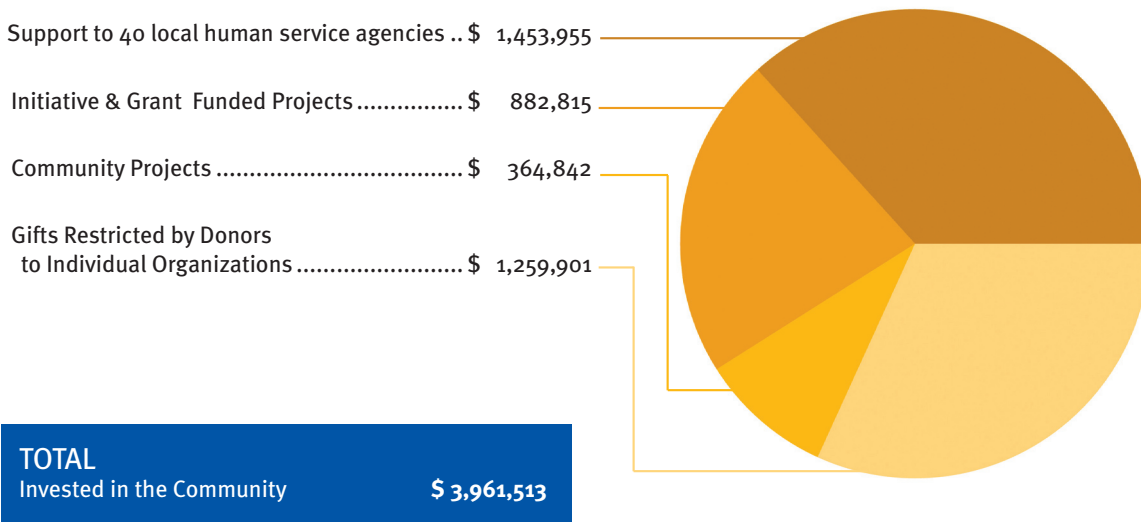

Your contribution is well spent.

A dollar is not simply passed through to service programs – it is invested and grows. United Way secures grant funding every year for our agencies and programs, in-kind gifts from businesses around Lane County enhance the work, and most importantly, United Way builds relationships and provides avenues for people power – the most valuable resource in our community.

We amplify charitable contributions with the strength of volunteerism, working as a community to strategically create positive change, now and for the future.

DOLLARS INVESTED IN THE COMMUNITY
